Note:

For PDI-16 (Gastroenteritis) and PDI-18 (Urinary Tract Infection) there is an issue with the Agency for Health Research and Quality (AHRQ) analysis requirements and the Florida Agency for Health Care Administration (AHCA) Inpatient discharge data.

The AHRQ analysis requirements for PDI-16 and PDI-18, state that "All non-maternal discharges ages 3 months to 17 years" need to be excluded, and the AHCA hospital discharge data file only includes a patient's age in full years.

The admissions and rates stated above for these two PDIs are based on children between 29 days of age to 17 years. Children 0-28 days of age have been excluded via a neonate exclusion. No further exclusion was possible.

The data file contains 5 code fields. From these 5 code fields, the CPT code found with the most severe acuity is used to categorize each patient record.
